

食品学院报告通知

The Role of Antimicrobial Peptides in Infection and Inflammation

邀请嘉宾:

Birgitta Agerberth 教授

瑞典卡罗林斯卡研究院
生物物理与生物化学系

主持:

孙嘉/陈永泉

食品学院功能脂质与健康中心

日期:

2013 年 5 月 28 日 (星期二)

时间: 上午 10:30 - 11:00

地点:

食品学院 9 楼厅

联系人: 孙嘉

电邮: jiasun@jiangnan.edu.cn

BIOSKETCH:

Birgitta Agerberth completed her PhD on bioactive peptides in 1993 at the Department of Biochemistry II, Karolinska Institutet. She performed her post-doc studies in Prof. Hans G. Bomans laboratory at the Department of Microbiology, University of Stockholm from 1993 to 1995. She was appointed as Associate Professor in Medical Biochemistry, Department of Medical Biochemistry and Biophysics, Karolinska Institutet in 1998. BA became a professor of Medical Microbial Pathogenesis, at the Department of MBB, Karolinska Institutet in 2008.

She was one of the principle researchers in the discovery of the human antimicrobial peptide LL-37 of the cathelicidin family. She has also been involved in pioneering work on host microbe interaction, human infections and inflammatory diseases with respect to LL-37. BA has published 115 original/review articles with a total citation of 7229.
